EDUCATION

Bachelor of Technology in Computer Science and Engineering
Vellore Institute of Technology (VIT Bhopal), India

Expected May 2027
CGPA: 8.21/10.0

TECHNICAL SKILLS

Web & Full-Stack Development: JavaScript, ReactJS, Next.js, Node.js, Express.js

Backend & Databases: Python, Flask, FastAPI, PostgreSQL, MongoDB, SQL, Firebase

Programming Languages & DevOps: Java, C++, Go, Git/GitHub, CI/CD, Docker, AWS, Agile/Scrum

AI & Automation: TensorFlow, PyTorch, Scikit-Learn, LangChain, NLP Pipelines, AI Agents, Pandas, NumPy

PROJECTS

CareerSync AI - AI Resume Builder & Analyzer | React.js, Node.js, Express.js, MongoDB GitHub

- Architected a full-stack career optimization platform leveraging React.js and Express.js, featuring real-time PDF parsing, dynamic resume generation, and actionable AI feedback to enhance user job prospects.
- Engineered an intelligent resume evaluation engine using the Google Gemini SDK, implementing robust multi-model fallback algorithms to guarantee uninterrupted AI generation during API outages.
- Implemented secure user authentication using JWT and strict data privacy protocols, ensuring safe and reliable handling of sensitive user profiles and career documents within MongoDB.

Auto ML Pro - Automated Machine Learning Platform | React.js, FastAPI, Python, Scikit-learn GitHub

- Architected a full-stack AutoML web application using React.js and FastAPI, streamlining the end-to-end data science lifecycle from data ingestion to model deployment.
- Engineered autonomous AI agents for data cleaning, comprehensive profiling, hyperparameter tuning, and model competition, significantly reducing manual data preprocessing and model selection time.
- Implemented a scalable, high-performance backend in Python that executes complex ML pipelines and delivers real-time training analytics to the frontend.

HireAI - AI-Powered Recruitment Platform | React, Flask, Node.js, PostgreSQL GitHub

- Built a full-stack platform automating candidate screening with AI agents and NLP-based semantic analysis, achieving 95% resume-to-profile mapping accuracy across 10,000+ candidates.
- Designed scalable RESTful APIs and a React/Redux dashboard integrated with a PostgreSQL database, implementing advanced indexing to cut query latency by 35% during high-volume searches.
- Delivered features in agile sprints alongside a cross-functional team, covering API design, debugging, testing, and production deployment of multichannel automation workflows.

CERTIFICATIONS

Google IT Support Certificate | Google Career Certificates Feb 2026

- Completed a comprehensive program covering IT fundamentals, networking, operating systems, system administration, and security, demonstrating hands-on proficiency in troubleshooting and technical support.

DevOps Fundamentals | IBM Career Education Program (CEDEV2IN) Jul 2025

- Gained hands-on foundation in CI/CD pipelines, containerization, and agile practices through IBM's Developer Skills Network, directly relevant to production-grade deployment workflows.

AWARDS & ACHIEVEMENTS

- Participated in **4+ National-Level Hackathons**, including the 100x Buildathon, collaborating in cross-functional teams to ideate, prototype, and ship full-stack solutions within 24–48 hour windows.
- Secured **3 signed Letters of Intent** from early-adopter clients for the HireAI platform, validating product-market fit through iterative development and 35+ user feedback sessions.
